

Azure based management system

neway LABS

Build cloud based environments when you need them and for the duration they are needed for, without wasting valuable resources with our new self-service, azure based, management system.

Self Service

Flexible & Personalized

Save Costs & Maximize Utilization

Smart Scheduling & Automation

Save Time & Increase Efficiency

Managed & Role Based Access Controls

Today, with organizations becoming more agile in nature, the need to rapidly validate assumptions using technological tools is very high.

At Neway, we recognize this need and came up with a solution that allows you to quickly establish lab environments using Azure resources for the limited amount of time you need it for, get your conclusions and remove it so your resources are being utilized at their maximum potential.

Our new self-service lab management portal provides organizations with the ability to easily manage environments in Azure, make better use of their available resources and retain the data that really matters.

Our tool offers the following:

- ✓ Built-in templates (pre-configured with Azure resources)
- ✓ Approval chain included for added control
- ✓ Administrative notifications
- ✓ Azure Resource Manager (ARM) support
- ✓ Dashboard reporting & billing - coming soon
- ✓ Full integration with Azure Active Directory
- ✓ Built-in role based management
- ✓ Fully customized to your needs
- ✓ Simple management for lab environments, On-demand and scheduled starting, stopping and deletion of labs.
